

**Jean-Christophe “JC” Eloy, 43 Years**

**Founder and CEO of Yole Development**

JC Eloy created YOLE Développement in 1998 and manages Yole Développement in terms of international development and strategic orientations of the company. He is directly in charge of the Mems and 3D IC activities at Yole Développement

JC Eloy and the 20 analysts of YOLE Développement are working directly with the key players of the industry from equipment and materials suppliers to device manufacturers and system integrators.

Past experience includes, 6 years as manager of the marketing department of CEA/LETI (France)- an applied R&D organization involved in the semiconductor, Mems and instrumentation fields (1300 researchers). He then created the semiconductor practice at Ernst & Young in Europe and worked as senior manager in charge of the development of European activities.

Jean-Christophe Eloy has been involved in the Mems and semiconductor areas since 1991.

JC Eloy is Engineer from INPG/ENSERG (semiconductor and telecommunications) and has an MBA from EM Lyon.
